

Medical Affairs Certificate Program Module E – Strategic partnering

Strategic partnering enables Medical Affairs professionals to co-create medical strategy and brand or compound planning, ensuring that patient journey scenarios are accurately represented.

In a matrix organization, success relies on effective internal and external partnering, especially when leading without administrative authority. Medical Affairs professionals must work cross-functionally, taking ownership of all medical activities while providing crucial medical education both internally and externally.

By collecting medical insights and defining patient needs, they can identify data gaps in marketed medicinal products, driving continuous improvement.

A strong foundation in business acumen is also crucial to align medical strategies with broader business objectives. Therefore, a dedicated training course on strategic partnering equips Medical Affairs professionals with the necessary skills for these collaborative and influential roles.

Derived chapters

The theory behind:

- Role of Medical Affairs in the product and patient journey
- Strategic partnering – providing medical leadership
- Integrated business plan
 - Basics of a business plan and medical strategy
